

E85 FUEL TESTER P/N 26-147

1. Add water up to the first line on fuel tester.
2. Carefully pour in E85 fuel up to the second line.
3. Replace cap and gently shake or flip tester to mix.
4. Allow the tester to settle by placing it on a flat stable surface or continue to steadily hold in your hand.
5. You will see a separation in the fuel mixture and will then be able to read the percentage of ethanol in your E85 fuel sample.
