

Small diameter pulley

Power steering pulleys may interfere with the suspension A-arm in certain swap applications. Choosing a smaller pulley in these situations can give additional clearance.

Power steering pump pulley

Holley part # 97-154

OD to grooves: 5.45"

OD overall: 5.75"

Warning: Smaller power steering pulleys such as 97-154 can rotate the pump beyond recommended RPMs. To correct this, a 25% under-dive balancer should be used if choosing a pump pulley smaller than 6" OD.

Belt Alignment Group	LS Application (Alignment Specific)	Balancer (25% under-drive)
		Powerbond part #
Standard	Corvette/CTS-V/G8	PBU1117SS25
Middle	F-body/GTO	PBU1480SS25
Long	Camaro ('10-UP)/ Truck (all)	PBU1190SS25

Belt length will change when moving from standard pulleys to different diameters.
