PERFORMANCE High Performance	
Fitting Instructions:	Fitting Instructions:		

1. Remove the original bush from the trailing arm.

2. Clean out any dirt or corrosion from the bore of the arm.

3. Push both polyurethane parts into the arm with part A (larger lip) facing outside the vehicle.

4. Apply the supplied grease to the inside of the bore of the polyurethane bush and the end faces of the bushes.

5. Fit the metal sleeve inside the bore so that it sits flush inside.

6. Fit the arm back onto the vehicle and tension all hardware to manufacturers recommended torque settings.
