

DINAN

DI100-094I SPRING SET; TESLA MODEL Y

INSTALLATION NOTES

PLEASE READ BEFORE BEGINNING INSTALLATION

The front & rear springs look similar to each other. Please refer to the part number printed on each spring to determine the correct installation location:

- DI100-1000 = Front Spring
- DI100-1002 = Rear Spring

** For best results, we recommend installation of the companion handling kit, p/n DI93-094I. Use of this kit would yield the lowered ride height and handling performance as designed. Using the stock bumpstops, or cutting the stock bumpstops, may result in undesirable results.

Alignment:

- An alignment is required after installation.
- All Dinan suspension alignments are done with no extra weight inside the vehicle.
- Specifications are as follows:

FRONT:	Setting	Tolerance
Camber	-1.3°	± 0.45°
Caster	5.7°	± 1.0°
Total Toe	0.06°	± 0.30°
REAR:		
Camber	-1.6°	± 1.00°
Total Toe	0.34°	± 0.30°

If you encounter any difficulties during the installation, or if these instructions are not clear to you, please call Dinan's Technical Support Staff @ (800) 341-5480.

Happy Motoring!
