1	Tool	DT001
1	Plug Drill	DD #5/32
1	Screw	DS0001

## STAGE ONE INSTRUCTIONS

**DYNOJET**  
2185CA.001

1. Remove the vacuum slide from the carbs. Remove the stock needles & spacers, noting the order of assembly.
2. Install the Dynojet needles on groove #4 from the top, using all stock spacers. Install the Dynojet washers (2 per needle) above the E-clip.
3. Remove the velocity stack plate and locate the main air jet passage (Fig.A). With the flat end facing into the carb, install the main air correctors (DCO200) provided. Use the tool (DT0001) provided to tap lightly in place.
4. Remove the stock main jets and replace with the Dynojet main jets provided. If you are running the stock exhaust use the CJ142 main jets, if you are running an aftermarket header or slip-on with high flowing baffle, use the CJ146 main jets. Be sure that the jets you are changing are the main jets.
5. Locate the fuel mixture plug (Fig. B), if you see a screw head at Fig. B proceed to adjusting procedure. With the DD #5/32 drill bit provided, carefully drill thru the plugs. NOTE: the mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break thru. Use screw provided to secure and remove the plug. Carefully turn mixture screws clockwise until they seat, turn out 3 turns.
