U.S Models Only

2000-01 Yamaha YZF1000 R1

Stage 1

For mildly tuned machines using the stock airbox, with stock or K&N filter. May also be used with a good aftermarket exhaust system. This kit was designed with the EXUP valve retained.

K&N filter #YA-1098

This graph shows a typical gain with a Dynojet jet kit.

WARNING

**NO SMOKING!

Parts List		
4	Main Jets	DJ130
4	Main Jets	DJ132
4	Main Jets	DJ134
4	Main Jets	DJ136
4	Main Jets	DJ138
4	Fuel Needles	DNO709
4	E-Clips	DE0001
4	Adjusting Washers	DW0001
4	Needle Springs	DSP77
4	Pilot Jets	DPJM018
1	Plug Drill	DD #5/32
1	Screw	DS0001

STAGE ONE INSTRUCTIONS

1. Remove the vacuum slides from the carbs. Remove the stock needles and spacers, noting the order of assembly (Fig. A).

2. Install the Dynojet needles on groove #3 from the top. Use all stock spacers (Fig. A). The small Dynojet washers are for half step increments and do not have to be installed at this time.

NOTE: The DSP77 springs do not have to be used, they are supplied in case the stock springs are misplaced. After installing the slides in the carbs be sure to check slide movement manually.

3. Remove the stock main jets and install the Dynojet main jets provided. If you are running the stock exhaust install the DJ132 main jets. If you are running the stock exhaust and a K&N filter install the DJ134 main jets. If you are running an aftermarket exhaust or slip-on with a high flowing baffle, use the DJ136 main jets. If you are running an aftermarket exhaust or slip-on with a high flowing baffle and a K&N filter, use the DJ138 main jets. Be sure that the jet you are changing is the main jet.

4. Remove the stock pilot jets and install the Dynojet pilot jets provided (DPJM018). The pilot jets are located next to the main jet.

5. Locate the fuel mixture plug (Fig. B). If you see a screw head at Fig. B proceed to adjusting procedure. With the DD #5/32 drill bit provided carefully drill through the plugs. **NOTE:** The mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break through. Use screw provided to secure and remove this plug. Carefully turn mixture screws clockwise until lightly seated, then back out 1-1/2 turns.
