

VLC/VLK-40F

Dakota Digital VLK Instrument Installation
For 1940 Ford car

Your new VLC/VLK-40F kit includes:

Installation

1. Remove the four screws holding the clock to the glove box on the back side.

2. Remove the clock assembly and rear housing.

3. Carefully position the new clock from the backside to avoid scratching the chrome. With the four screws provided, secure the new clock to your original glove box.

4. Connect the CAT5 cable to the new clock; with the VLC, connect the power harness as well. Take care when routing this cable to the control box.

5. Refer to the Operating Manual to complete the clock setup.
