

**Thank you for purchasing this instrument from Intellitronix. We value our customers!**

## **INSTALLATION GUIDE**

### **LED Digital Clock**

**Part Number: M8009**

**\* Always disconnect the battery *before* attempting any electrical work on your vehicle.\***

### **WIRING INSTRUCTIONS**

*Note: Automotive circuit connectors are the preferred method of connecting wires. However, you may solder if you prefer.*

*Ground - **Black*** Connect directly to the engine block.

*Power - **Red*** Connect to a switched +12V source, such as the ignition.

*Memory - **Pink*** Connect directly to the battery to retain the time when the ignition is shut off.

*Dimmer - **Purple*** Connect to the parking lights to dim the LEDs 50% when the headlights are on. However, **do not** connect to the headlight rheostat control wire; the dimming feature will not work properly.

Once the gauge is wired in, program the time with the two separate push buttons for hours and minutes.
