

Installation Instructions for 2008-2014 Challenger Front LED Sidemarkers Lights

Step 1:

Using a trim panel removal tool, carefully pry between the front sidemarkers light and the bumper to release the clip. Slide the sidemarkers light out to remove from the bumper.

Step 2:

Twist the socket counter-clockwise to remove from the factory light. Then remove the bulb from the socket.

Step 3:

Plug in the light into the factory light socket. Twist the light socket into the light clockwise. **Note: Test the light for proper function. If it does not light up, rotate the socket 180 degrees.

Step 4:

Insert the locating tab into the bumper, then carefully press the light until it clicks into place securing it to the bumper.

Installation Instructions for 2008-2014 Challenger Rear LED Sidemarkers

Step 1:

Using a trim panel removal tool, carefully pry between the rear sidemarkers and the bumper to release the clip. Slide the sidemarkers out to remove from the bumper.
